WiFinder

About

WiFinder is a free service that helps digital nomads and remote workers locate nearby wifi hotspots.

With the goal of providing greater flexibility and mobility, WiFinder is the perfect tool for those who need to stay connected while on the go. Whether you're working from a coffee shop or a library, WiFinder makes it easy to find and connect to free wifi services in your local area.

Development Plans

At our core, we're committed to making the Internet accessible to everyone, no matter where you are in the world and where you want to work. With that in mind, we're thrilled to announce that we'll be launching a new user section in our app. This section will give you the opportunity to contribute to the network by adding locations where Wi-Fi is available and providing feedback on the quality of service.

By collaborating with users like you, we can build a truly global wireless network that connects people from all corners of the world. Join us in our mission to bridge the digital divide and make the world more connected, one hotspot at a time.

Credits

The web app was built over two weeks as part of a UX design EdX bootcamp by

- Matt Jones
- Marc Hudson
- Kelvin Enaro
- Fionnuala O'Donnell
